MobileClock App Installation and Setup

> If you're having trouble setting up the mobile app, you can access TCP on the web at the following URL
>
> https://274066.tcplusondemand.com/app/webclock/#/EmployeeLogOn/274066/1

iOS

The MobileClock app is downloadable from the Apple App Store®. To find it, simply search for "TCP MobileClock," choose TCP MobileClock, and install it like you would any other app.

After installing, you will need to set up the app for the first time:

1. Open the app on your device. This should present you with an introduction screen.
2. In the **Customer ID** box, enter **274066** then press **Next**.
3. If prompted, configure push notifications.
4. Enter your employee ID in the **ID Number** box then press **Next** to log in.

Android

The MobileClock app is downloadable from Google Play™. To find it, simply search for "TimeClock Plus v7 MobileClock," choose MobileClock, and install it like you would any other app.

After installing, you will need to set up the app for the first time:

1. Open the app on your device. This should present you with an introduction screen. Press **Next**.
2. Enter correct information on each subsequent screen. This will consist of:

- **Scheme**: HTTPS.
- **Host** and **Port**: 274066.tcplusondemand.com Port: 443
- At this point you may receive a meassage about the version being updated. Please click Ok
- Click through the setup until you get to the Namespace window.
- **Namespace**: 274066

- **Select Company**: Princeton ISD 1

1. Log in with your Employee ID
